## Worksheet 1 Mathematics Bullseye

Visit [myfuture](https://myfuture.edu.au) and explore the Career Bullseye chart for Maths. A Career Bullseye chart shows a selection of occupations that are related to a particular field, in this case Mathematics. The rings of the bullseye show the skill level required for those jobs, with level 1 usually requiring completion of year 10 or a certificate I or II, and level 4 usually requiring at least a bachelor's degree or higher.

1. What does the wide range of occupations and industries on the bullseye tell you about the importance of maths in the world of work?

2. Were there any occupations you were surprised to see on that list? Why/why not?

3. Do you know anyone working in one of the occupations on the bullseye? Was there an occupation you'd like to find out more about?
