

ACE Network Subject Information Guide

Frontiers of Applied Cryptography

Semester 2, 2025

Administration and contact details

Host department	School of Science, Discipline of Mathematics
Host institution	RMIT University
Name of lecturer	Dr. Arathi Arakala and Dr. Amy Corman
Phone number	99252279 and 99256482
Email address	Arathi.arakala@rmit.edu.au and amy.corman@rmit.edu.au
Homepage	https://www.rmit.edu.au/contact/staff-contacts/academic-staff/a/arakala-dr-arathi and https://www.rmit.edu.au/contact/staff-contacts/academic-staff/c/corman-dr-amy
Name of honours coordinator	Assoc. Prof. Stephen Davis
Phone number	99252278
Email address	Stephen.davis@rmit.edu.au
Name of masters coordinator	
Phone number	
Email address	

Subject details

Handbook entry URL	http://www1.rmit.edu.au/browse/;CURPOS=1?STYPE=ENTIRE&CLOCATION=Study+at+RMIT%2F&QRY=%2Btype%3Dflexible+%2Bsubtype%3Dheparta+%2Bkeywords%3D%28INTE1127%29+&course=INTE1127&title=&Search=Search
Subject homepage URL	TBD
Honours student hand-out URL	TBD
Teaching period (start and end date):	TBA

Exam period (start and end date):	TBA
Contact hours per week:	1.5 hour weekly class 1 hour weekly drop-in session (optional)
ACE enrolment closure date:	TBA
Lecture day(s) and time(s):	TBA
Description of electronic access arrangements for students (for example, LMS)	Canvas access can be given.

Subject content

1. Subject content description

The course will present technical aspects of symmetric key and public key cryptosystems and attacks on their security, as well as the algorithms for factoring and primality testing which enable the generation of public keys. The course will then focus on new developments in the field including quantum computing, quantum safe cryptography and blockchain.

2. Week-by-week topic overview

- Week 1: Block Ciphers
- Week 2: Elliptic Curves
- Week 3: Elliptic Curve Cryptography
- Week 4: Quantum Computing Algorithms
- Week 5: Post Quantum Cryptography
- Week 6: Quantum Key Distribution
- Week 7: Blockchain algorithms
- Week 8: Applications of Blockchain
- Week 9: Anonymity and Privacy
- Week 10: Applications of Anonymity and Privacy
- Week 11: Protocol Attacks
- Week 12: Homomorphic Encryption

3. Assumed prerequisite knowledge and capabilities.

You should have a basic understanding of cryptography including concepts of symmetric and asymmetric ciphers. Familiarity with the R programming language is advantageous as some assessment tasks will require R

4. Learning outcomes and objectives

1. Critically review new theoretical and practical developments in cryptography and their impact on contemporary information systems.
2. Recognise and justify the role of cryptanalysis in the design of secure systems.
3. Critically analyse technical details of contemporary cryptosystems.

- AQF specific Program Learning Outcomes and Learning Outcome Descriptors (if available):**

[illegible]

**Learning Outcome Descriptors at AQF Level 8****Knowledge**

K1: coherent and advanced knowledge of the underlying principles and concepts in one or more disciplines

K2: knowledge of research principles and methods

Skills

S1: cognitive skills to review, analyse, consolidate and synthesise knowledge to identify and provide solutions to complex problem with intellectual independence

S2: cognitive and technical skills to demonstrate a broad understanding of a body of knowledge and theoretical concepts with advanced understanding in some areas

S3: cognitive skills to exercise critical thinking and judgement in developing new understanding

S4: technical skills to design and use in a research project

S5: communication skills to present clear and coherent exposition of knowledge and ideas to a variety of audiences

Application of Knowledge and Skills

A1: with initiative and judgement in professional practice and/or scholarship

A2: to adapt knowledge and skills in diverse contexts

A3: with responsibility and accountability for own learning and practice and in collaboration with others within broad parameters

A4: to plan and execute project work and/or a piece of research and scholarship with some independence

5. Learning resources

R.L. Burden and J.D. Faires, Numerical Analysis, 9th edition, Brooks and Cole

- Brockwell, P. and Davis, R., An Introduction to Time Series and Forecasting, Springer-Verlag, 1996.

6. Assessment

Exam/assignment/classwork breakdown					
Report	20%	Practical Assessment	30%	In class Asses	50 %
Assignment due dates	Week 4 (Practical)	Week 6 (In-class test)	Week 7 (Practical)	Week 11 (Practical)	Week 12 (In-class test)
Approximate exam date				TBA	

Institution honours program details – To Be Determined
